

# K-2 Mathematics **SCAVENGER HUNT**

In Gadgets you will find many different objects of all shapes and sizes, each having a special use. See if you can find at least one of each of the shapes below, what is it being used for? Are any of them used together? Draw what you find!

Rectangle

Ball

Triangle

Find the Air Cannon. Shoot balls and aim for the funnel, is it hard to get them in?

Try shooting five balls at the same time, how many made it in?

Try 10 balls, how many made it in?

Will more balls go in when more are shot at the same time?

Find the three bowling balls. Does each ball look the same?

Try to lift each of the balls, what do you notice?

Where is the bowling ball the heaviest?

How much does it weigh there?

What are the units?

At the erosion table, place mounds of sand in the path of the water, is the water reaching the end of the table quickly?

Try removing half of the sand, can more water flow through now?
