

K—2 TECHNOLOGY SCAVENGER HUNT

Chaperones: Share the following with your students. “Technology is anything that makes life easier or better in some way. COSI is full of different kinds of technology. Look for inventions all around COSI, and find things that help us every day.”

Visit the town of Progress in the year 1898. Listen! What sounds do you hear? Do you hear cars or planes or radios? Were any of these things invented yet?

Pick your favorite place in 1898 and pretend that it is your store or home. Go shopping, hang out with your friends, or help a customer. How is it different from how you live today?

Now go to 1962. What are some things that are different from 1898?

In Gadgets, you'll find lots of inventions that help make life easier. Can you find:

Something that helps us see at night?

Something that helps us move from place to place?

Something that helps us travel across a river?

Anywhere:

If you could take home anything from COSI, what would it be? What would you use it for?
